

PROTECT

COUNTY RECORD SYSTEMS

7 CRITICAL ACTIONS TO **STOP** AI & BOT SCRAPING

PUBLIC RECORDS ARE FOR THE PUBLIC - NOT FOR BOTS.

THE PROBLEM

AI and automated bots are overwhelming public record systems.

- Systems slow down or crash
- Sensitive data can be exposed at scale
- Counties lose control of access
- Fraud risks increase

These systems were built for people-not machines running thousands of searches per minute.

WHY IT MATTERS

County record systems support critical functions:

Real estate & title transactions

Legal filings & compliance

Lending & financial decisions

Without safeguards, public record data becomes a **LIABILITY** instead of an **ASSET**.

THE REALITY

Thousands of automated queries can hit a system instantly-extracting data faster than it can be managed or protected.

THIS IS HAPPENING RIGHT NOW.

TAKE ACTION NOW PROTECT YOUR COUNTY BEFORE SYSTEMS ARE COMPROMISED.

SEND A PRE-FILLED EMAIL to your County Administrator in less than 60 seconds

HELP PROTECT PRIVACY, PREVENT FRAUD, AND ENSURE RESPONSIBLE ACCESS.
